SAFETY CLIMB SYSTEMSFOR ALL THINGS FASTENING AND **SAFETY.**

Allfasteners' Travel8/Safety Climb Showcases Longevity and Safety in the Field

The Allfasteners Safety Climb System utilizes the Travel8 Energy Absorber, which has long been inimitable for its functionality and reliability, while performing strongly and safely for every climber. As an example, the Travel8 showcased below has been continually in service for over 13 years, all while exposed to repetitive climbing and harsh environmental conditions including extreme temperature, UV light, and rain. To date it's still undeployed and ready to save a life just as reliably as the day it left the factory, and will be ready to act if a climber were to fall on the system. The Allfasteners Travel8 is the industry's only 100% stainless steel shock absorber and is simply unrivalled in terms of longevity, versatility, and simple reliability.

NO MORE PREMATURE DEPLOYMENT.
